Further information may be required to accurately calculate the sewer connection fee, depending on the type of use.

Permit must be entirely completed and the connection fees of \$_____ must be paid in full before this permit will be approved and granted. Water and /or Sewer work shall not begin until permit is approved.

This application to connect to the City of Somersworth Water and/or Sewer System is made by the undersigned who agrees, as the authorized representative or owner and for future owners, to indemnify the City from any loss or damage that may directly or indirectly be occasioned by said connection to the system. The City of Somersworth in no case, assumes any responsibility or liability by reason of granting this permit. The applicant also understands and agrees that with the approval of this permit, and the completion of connection, a water/sewer account will be created or adjusted in accordance with the request of this permit. If the information provided by the applicant is incorrect, the applicant understands and agrees that there could be additional fees based on the fees outlined on the back-side of this application and in the ordinance. The undersigned further acknowledges that he/she is familiar with and agrees to abide by the City of Somersworth Water and Sewer Ordinances.

Return completed permit application to:

Somersworth Water Department

~ THIS SIDE TO BE COMPLETED AND CALCULATED BY THE UTILITY ~
based on fees outlined in the Water and Sewer Ordinances

***BACKFLOW DEVICES** – A backflow device is a device or means designed to prevent backflow or backsiphonage.

- ALL Commercial and Industrial Customers are required, according to regulation, to have one or more backflow prevention devices installed and shall assume the responsibilities as contained in the Somersworth Water Ordinance.
- Residential properties with a pool, hot tub, Jacuzzi, or irrigation line are required to have a testable backflow device installed on the water service line.
- An approved backflow prevention device must be installed according to the degree of hazard, if a backflow were to occur.
- In cases of a high hazard threat, a Reduced Pressure Zone (RPZ) Device, or similar, is required.
- In cases of a low hazard threat, a Double Check (DC), Pressure Vacuum Breaker (PVB), or similar, is required.
- For more information regarding backflow prevention requirements, you may contact Somersworth Water Department at 603-692-9523. For more detailed information on backflow regulations, refer to the City of Somersworth Water Ordinance or contact the New Hampshire Department of Environmental Services.
